William M. Singletary, MD

William Singletary is a child, adolescent, and adult psychiatrist, a member of the faculty and supervising analyst of the Psychoanalytic Center of Philadelphia, and President of the Board of the Margaret S. Mahler Child Development Foundation. He is in private practice in Philadelphia, PA and has worked in intensive psychotherapy with children and adults with ASD for over 30 years. He was instrumental in the formation of an international organization, INSPIRA, dedicated to psychoanalytic understanding, research and treatment of autism. Over many years Bill has worked to promote an interdisciplinary collaboration

involving psychoanalysts, psychologists, neurobiologists, pediatricians, and others working in the field of autism. A major focus of his work has been on how building relationships contributes to changing the brain. Since 2017 he has served as chairperson of the Autistic Spectrum Disorder Committee of the Department of Psychoanalytic Education of the American Psychoanalytic Association. He contributed the chapters on neuroscience for the book, *Autism Spectrum Disorder: Perspectives from Psychoanalysis and Neuroscience* by Susan Sherkow and Alexandra Harrison. More recently, his paper, "An Integrative Model of Autism Spectrum Disorder", which was a Target Article in *Neuropsychoanalysis*, describes the pathological role of stress in ASD, on both the neurobiological and psychological levels, and the importance of the development of loving relationships and emotional regulation in its alleviation.

Irith Barzel-Raveh Irith

Barzel-Raveh is Senior Clinical Psychologist and Supervisor. She is Organizational Consultant, Founder and Chairwoman of the Israeli Neuropsychoanalytic Society, Founder member and Board member of the International Neuropsychoanalytic Society.
